Other information

As per college policy, all students will be expected to be equipped for their classes and bring all resources to each lesson unless stated otherwise.

The opportunity to attend guest speaker talks should be taken so that they can demonstrate a participation in extra-curricular activities, spark their interest and deepen their understanding. Furthermore, it is an expectation that all students undertake work experience. Due to the nature of psychology, if they have an interest in work experience within this area, they should start trying to secure positions as soon as possible.
